

Wood Biscuits

Dimar's joiner biscuits are made from high quality Beechwood. Beech is exceptionally strong and stiff; it is similar to red oak. Beech has the highest shock resistance of any native wood. The biscuits are strong & consistent in thickness and shape. Measuring 5/32" in thickness, they fit well into slots made by all biscuit cutters and router machines. Packaged in nylon bags to maintain moisture content and dimensional stability.

Tool no.	Size	Description	Category
BJ0	# 0 (46mm x 15mm x 4mm)	# 0 Biscuit, 1000 pcs. per box	BJ
