

Conventional lip tears wood on entry.

The negative angled tips score the wood before the cutting edges penetrate the wood.

## Lipped Brad Point Drill Bits For Wood - Chrome Vanadium Steel

Lipped Brad Point drill bits are recognized as the best brad-point drills for carpenters, cabinet makers, & professional woodworkers. The polished double edge flutes produce incredibly accurate and clean holes. The sharp and defined true brad point tips have a negative angle that score the hole perimeter, resulting in effortless, tear free clean entry. Available individually or in sets.
