### 10" Dimar Finishing Blade

[« Previous](#)

#### The lowdown

That cool, blue colour of the Dimar 10" finishing blade is not just a design feature. The sides and teeth are covered in the proprietary D-Coat, which is embedded into the surfaces. This coating protects the blade from rust and resin. To clean off pitch buildup, you simply need water and a towel. This 80-tooth blade slices wood and laminates with ease on your tablesaw. (\$105, [dimar-canada.com](#))
